<input type="checkbox"/>	Question Type	Question	A	B	C	D	Answer	Remark
<input type="checkbox"/>	FBQ	The mean, mode, medium, variance etc are examples of _____ estimates.	point					<input type="button" value="eExam"/>
<input type="checkbox"/>	FBQ	_____ refers to the formula or statistic which has been chosen to provide an estimate of the population value.	estimator					<input type="button" value="eExam"/>
<input type="checkbox"/>	FBQ	An _____ is value of the sample statistic which is taken as an approximation of the parameter value.	estimate					<input type="button" value="eExam"/>
<input type="checkbox"/>	FBQ	_____ cannot control who fills out the questionnaire.	researchers					<input type="button" value="eExam"/>
<input type="checkbox"/>	FBQ	The concept of _____ is central to sampling theory and to determining the size of a sample.	standard error					<input type="button" value="eExam"/>
<input type="checkbox"/>	FBQ	_____ is more convenient than simple random sampling.	Systematic sampling					<input type="button" value="eExam"/>
<input type="checkbox"/>	FBQ	_____ the basic probability sampling design, and it is incorporated into all the more elaborate probability sampling designs.	Simple random sampling					<input type="button" value="eExam"/>
<input type="checkbox"/>	FBQ	_____ is to select a sample that is as similar as possible to the sampling population.	quota sample					<input type="button" value="eExam"/>

<input type="checkbox"/>								
<input type="checkbox"/>	FBQ	A single member of a sampling population is referred to as a <input type="text"/>	sampling unit					eExam
<input type="checkbox"/>	FBQ	A particular value of the population, such as the mean income or the level of formal education, is called a <input type="text"/>	parameter					eExam
<input type="checkbox"/>	FBQ	These are problems encountered in the construction of index numbers except <input type="text"/>	the choice of considered					eExam
<input type="checkbox"/>	FBQ	Forecast simply means statement <input type="text"/>	that predicts future with the help of both past and present					eExam
<input type="checkbox"/>	FBQ	It has been found that 2% of the tools produced by a certain machine are defective. What is the probability that in a shipment of 400 such tools is <input type="text"/>	0.007					eExam
<input type="checkbox"/>	FBQ	One way in which a representative sample may be obtained from a population is by <input type="text"/>	simple random sampling					eExam
<input type="checkbox"/>	FBQ	Sampling distribution is the <input type="text"/>	Most fundamental of inductive statistics					eExam
<input type="checkbox"/>	FBQ	A quick but light stepping and jumping movement done on the balls of the feet is called <input type="text"/>	skipping					eExam
<input type="checkbox"/>	FBQ	The first case of doping was the use of <input type="text"/>	Anabolic steroids					eExam
<input type="checkbox"/>	FBQ	A network of blood vessels that runs through canals in the layer of compact bones is called <input type="text"/>	Haversian system					eExam
<input type="checkbox"/>	FBQ	When a portion of the intestine pushes itself through the layer of skeletal muscles in the groin is called <input type="text"/>	Hernia					eExam

<input type="checkbox"/>									
<input type="checkbox"/>	FBQ	Muscle strain is also called <input type="text"/>	pulled muscle						eExam
<input type="checkbox"/>	FBQ	A <input type="text"/> Is a prolonged muscle contraction causing pain	cramp						eExam
<input type="checkbox"/>	FBQ	The bones of a baby are affected by <input type="text"/>	cartilage						eExam
<input type="checkbox"/>	FBQ	Living organs that are made up of cells is known as <input type="text"/> -	Bones						eExam
<input type="checkbox"/>	FBQ	There are skeletal, smooth and <input type="text"/> Muscles	cardiac						eExam
<input type="checkbox"/>	FBQ	Attached to bones are <input type="text"/>	muscles						eExam
<input type="checkbox"/>	FBQ	The freedom from danger or ability to detect it is called <input type="text"/>	safety						eExam
<input type="checkbox"/>	FBQ	What remains on top of the list of a man's priorities is <input type="text"/>	safety						eExam
<input type="checkbox"/>	FBQ	The movements in which the body moves completely from one position to another is called <input type="text"/>	locomotor movements/ skills						eExam
<input type="checkbox"/>	FBQ	The school and the home form learners <input type="text"/>	environment						eExam
<input type="checkbox"/>	FBQ	The activities performed by an individual during hours he is not at work is called <input type="text"/>	recreation						eExam
<input type="checkbox"/>	FBQ	An aspect of physical education that deals with physical activities outside the classroom but within the school is called <input type="text"/>	Intramural activity						eExam
<input type="checkbox"/>	FBQ	What physical education covers or its components constitute its <input type="text"/>	scope						eExam

<input type="checkbox"/>									
<input type="checkbox"/>	FBQ	Individuals acquire formal knowledge in physical education through <input type="text"/>	instructional activity						eExam
<input type="checkbox"/>	FBQ	What is responsible for diverse definitions of health is <input type="text"/>	past experiences						eExam
<input type="checkbox"/>	FBQ	The commonest natural disaster in a school environment is <input type="text"/>	erosion						eExam
<input type="checkbox"/>	FBQ	A strong flexible material provided by bone cells which is held together by minerals <input type="text"/>	collagen						eExam
<input type="checkbox"/>	FBQ	Walking home after close of work is a form of <input type="text"/>	recreation						eExam
<input type="checkbox"/>	FBQ	Stimulants and narcotics are <input type="text"/> Substances	doping						eExam
<input type="checkbox"/>	FBQ	Doping dates back to the <input type="text"/> _time	medieval						eExam
<input type="checkbox"/>	FBQ	The proportion of fat free mass in the body is called <input type="text"/>	body composition						eExam
<input type="checkbox"/>	FBQ	The activity to move the joint through full range of motion is called <input type="text"/>	flexibility						eExam
<input type="checkbox"/>	FBQ	The amount of force a muscle can produce with a single maximum effort is known as <input type="text"/>	muscular strenght						eExam
<input type="checkbox"/>	FBQ	A set of [physical activities that allows a body to respond to the needs and stress of physical effort is called <input type="text"/>	physical fitness						eExam
<input type="checkbox"/>	FBQ	Physical education eemphasises mainly affective and <input type="text"/> Domains	psychomotor						eExam

<input type="checkbox"/>									
<input type="checkbox"/>	FBQ	The type of education given to learners in order to live an accident free life is called <input type="text"/>	safety education						eExam
<input type="checkbox"/>	FBQ	Movement in the water is called <input type="text"/> Movements	acquatic						eExam
<input type="checkbox"/>	FBQ	Movement on the land is called <input type="text"/> Movement	terrestrial						eExam
<input type="checkbox"/>	FBQ	The concept of a sound mind in a sonud body is the concern of <input type="text"/>	physical education						eExam
<input type="checkbox"/>	FBQ	Jumps and tumbling are examples of <input type="text"/> Movements	Aerial						eExam
<input type="checkbox"/>	FBQ	Aspects of physical education invoving activities organised or engage outside the fourwalls of a school are <input type="text"/>	extramural activities						eExam
<input type="checkbox"/>	FBQ	A safe and healthy school environment refers to an environment which attend to the pysical, aesthetic <input type="text"/>	surrounding						eExam
<input type="checkbox"/>	FBQ	Singing is a form of <input type="text"/> _movement.	rhythmic						eExam
<input type="checkbox"/>	FBQ	Aposition where the body is laid flat and straight on the floor or ground is called <input type="text"/>	lying						eExam
<input type="checkbox"/>	FBQ	Tumbling in gymnastics is an example of <input type="text"/>	rolling						eExam
<input type="checkbox"/>	FBQ	Health is a means to an end and not an end in <input type="text"/>	itself						eExam
<input type="checkbox"/>	FBQ	The condition in which a tendon becomes irritated and swollen is called <input type="text"/>	tendonitis						eExam

<input type="checkbox"/>									
<input type="checkbox"/>	FBQ	The ability to sustain a given level of muscle tension for a long interval of time is called <input type="text"/>	muscular endurance						eExam
<input type="checkbox"/>	FBQ	The ability to perform or sustain a prolonged, large-muscle and variety of exercises at moderate to high levels of intensity is called <input type="text"/>	cardiorespiratory endurance						eExam
<input type="checkbox"/>	FBQ	Learning how to cross the road and using the Zebra crossing signs is an aspect of <input type="text"/> Education	safety						eExam
<input type="checkbox"/>	FBQ	Non-locomotor movements are also called <input type="text"/>	Axial movemenys						eExam
<input type="checkbox"/>	FBQ	The narrow portion of the bone between the layer of tissue is called <input type="text"/>	shaft						eExam
<input type="checkbox"/>	FBQ	Bones are living <input type="text"/>	organs						eExam
<input type="checkbox"/>	FBQ	A bone with large ends and a narrow middle is known as <input type="text"/>	long bone						eExam
<input type="checkbox"/>	FBQ	Recreation activities can be helpful in terms of providing the potential of adding more years to one's <input type="text"/>	life						eExam
<input type="checkbox"/>	FBQ	Risk factors in doping can be categorized into physical, psychological, and <input type="text"/>	emotional						eExam
<input type="checkbox"/>	FBQ	National Hesth Education Curriculum was introduced in the year <input type="text"/>	1985						eExam
<input type="checkbox"/>	FBQ	Award of prizes are given to <input type="text"/> best competitors in an event	3	three					eExam
<input type="checkbox"/>	FBQ	Aform of sports organised within a school is called <input type="text"/>	interhouse sports						eExam

<input type="checkbox"/>								
<input type="checkbox"/>	FBQ	The use of drugs to enhance performance in sports is called <input type="text"/>	doping					eExam
<input type="checkbox"/>	FBQ	The interrelatedness of physical , emotional and social conditions that affect student's well-being is called <input type="text"/>	psychological environment					eExam
<input type="checkbox"/>	FBQ	Lifting up a body one on foot and landing on the ball of the same foot is called <input type="text"/>	hopping					eExam
<input type="checkbox"/>	FBQ	Fundamental basic skills are classified into <input type="text"/>	locomotor and non- locomotor					eExam
<input type="checkbox"/>	FBQ	The movement that allows both feet to leave the ground with one leading the other and land one after the other is called <input type="text"/>	skills and knowledge					eExam
<input type="checkbox"/>	FBQ	The inadequacy of skills in the basic skills by a pupil could lead to <input type="text"/>	poor performance					eExam
<input type="checkbox"/>	FBQ	Instructional activity in physical education allows pupils to acquire <input type="text"/>	skills and knowledge					eExam
<input type="checkbox"/>	MCQ	_____ occur naturally in all spheres of business activity.	time series	numerical data	cummulative	none of the above	A	eExam
<input type="checkbox"/>	MCQ	_____ can be used to generate the general picture (or trend) behind a set of data or time series.	time series	moving average	ratio	scatter	B	eExam
<input type="checkbox"/>	MCQ	_____ are forecasts based solely on past and present values of the variable to be forecast.	short term	contrapolation	extrapolation	all of the above	C	eExam
<input type="checkbox"/>	MCQ	_____ are forecasts concerning the near future.	long term forecast	short term forecast	middle term forecast	none of the above	B	eExam
<input type="checkbox"/>	MCQ	_____ are based on past performances.	forecasts	regression	Indifference	efficient	A	eExam
<input type="checkbox"/>	MCQ	_____ is not designed to test equality of several population variances.	Anova	Canova	correlation	none of the above	A	eExam

<input type="checkbox"/>								
<input type="checkbox"/>	MCQ	ANOVA technique enables us to compare several _____ means simultaneously.	multiple	spearsmans	measures	population	D	eExam
<input type="checkbox"/>	MCQ	ANOVA can be (a) _____ way classification or (b) two-way classification.	eight	ten	five	one	D	eExam
<input type="checkbox"/>	MCQ	_____ as a tool has different dimensions and complexities.	Regression	Manova	Anova	Analysis	C	eExam
<input type="checkbox"/>	MCQ	O1, O2, O3, .....Ok, called _____ frequencies.	expected	observed	maximum	ratio	B	eExam
<input type="checkbox"/>	MCQ	_____ test of goodness of fit.	Chi-square	variance	sample	all of the above	A	eExam
<input type="checkbox"/>	MCQ	The square of a standard normal variable is called a _____	statistics	seven square	four square	Chi-square	D	eExam
<input type="checkbox"/>	MCQ	All one tailed tests for _____ at level of significance " $\alpha$ " will be right tailed tests only with area " $\alpha$ " in the right.	Yo	Po	Ho	Zo	C	eExam
<input type="checkbox"/>	MCQ	For _____ tailed tests, the critical values are located in the right tail of F-distribution with area ( $\alpha/2$ ) in the right tail.	seven	hundred	two	eleven	C	eExam
<input type="checkbox"/>	MCQ	_____ statistic is the ratio of two independent chi-square variates divided by their respective degrees of freedom.	A	F	M	O	B	eExam
<input type="checkbox"/>	MCQ	One of the responsibilities of the host community to ensure safety of school facility is	to cooperate with school authority on safety matters	disorganise the school security gate	undertake social functions on the school compound	instil fears in students and teachers by carrying dangerous weapons	B	eExam
<input type="checkbox"/>	MCQ	Which is NOT a characteristics of a safe school environment?	lawns are well moored	restricted flow of movement	classrooms are adequately ventilated	facts are well arraigned	B	eExam
<input type="checkbox"/>	MCQ	A safe school environment should be teacher and learner	repulsive	secured	focused	friendly	D	eExam
<input type="checkbox"/>	MCQ	Who should be held responsible most for bad maintenance culture in a school systems?	school principals	students and parents	principals and teachers	gardeners and security	C	eExam
<input type="checkbox"/>	MCQ	The following are learning units in safety education EXCEPT	using the swimming pool	concealing accidents	avoiding sharp objects	safety gadgets	B	eExam

<input type="checkbox"/>								
<input type="checkbox"/>	MCQ	Unplanned events or occurrences which can be controlled through balanced safety practices is called	safety	accidents	injuries	threats	B	eExam
<input type="checkbox"/>	MCQ	Which of the following is NOT a safety measures in the school environment?	fire extinguisher	sand bucket	safety jacket	coarse floor	C	eExam
<input type="checkbox"/>	MCQ	safety problems that contribute to the cases of absenteeism and poor academic achievement in the school consists of the following EXCEPT	crash	falls	bruises	drowning	A	eExam
<input type="checkbox"/>	MCQ	Which of the nature and scope of safety involves training?	safety involves discipline	it is a pre-condition for safe living	it is a matter of habit	it is a skill acquisition process	D	eExam
<input type="checkbox"/>	MCQ	Which of the following is NOT a correct definition of safety?	ability to detect hazards	freedom from danger	personal health promotion	risk mismanagement	D	eExam
<input type="checkbox"/>	MCQ	What conditions increase safety problems after the primitive age?	education and literacy	professionalism and complacency	civilisation and technology	sports and games	C	eExam
<input type="checkbox"/>	MCQ	The basic need of man that closely related to physical and health education is	clothingg	shelter	safety	affection	C	eExam
<input type="checkbox"/>	MCQ	The award of prizes are given to how many best competitors in each event?	2	3	4	6	B	eExam
<input type="checkbox"/>	MCQ	What major consideration should be considered in selecting activities for pupils' sport competition?	the ability of the pupils	selection of technical officials	registration of athletics	school head cooperation and support	A	eExam
<input type="checkbox"/>	MCQ	Which of these sports activities might NOT be applicable to primary school pupils?	shortput	egg and spon race	catching the train	athletics	A	eExam
<input type="checkbox"/>	MCQ	When the games master decide on sports' events, list officials and sought headmaster's permission he is carrying out	sports monitoring	sport planning	sports competition	sport evaluation	B	eExam
<input type="checkbox"/>	MCQ	The following constitute steps that are necessary for achieving results in sports organisation EXCEPT	activities	records	rules and regulations	safety negligence	D	eExam
<input type="checkbox"/>	MCQ	A form of sports organised within the school is	interschool football competition	cross-country race	interhouse sports	intra-state game	C	eExam
<input type="checkbox"/>	MCQ	Sports and games competition organised within the school are called	internal	intramural	extramural	intermural	B	eExam

<input type="checkbox"/>								
<input type="checkbox"/>	MCQ	The responsibility of effective administration and organisation of sports in the primary school rest on	physical education teacher	school headmaster/mistress	referees and linesmans	sports and games committee	A	eExam
<input type="checkbox"/>	MCQ	Which of the following is NOT an objective of recreation programm?	promoting resilliency	creating unhealthy relationship	promoting healthful relationship	enhancing wellness behaviours	B	eExam
<input type="checkbox"/>	MCQ	The use of drugs to affect the performance in sports is known as	doping	treatment	energizer	prescription	C	eExam
<input type="checkbox"/>	MCQ	An obsessed person is vulnerable to the following health problems EXCEPT	heart disease	joint problems	chronic headache	gallbladder	C	eExam
<input type="checkbox"/>	MCQ	What requires strong, powerful muscles in order to produce smooth and easy performance of everyday activities?	flexibility	rigidity	muscular strength	muscular endurance	B	eExam
<input type="checkbox"/>	MCQ	The ability to perform a prolong and large-muscle variety of exercises at moderate to high levels of intensity is called	neuro excretory tolerance	cardiorespiratory endurance	haemoglobin interchange	muscular reliance	A	eExam
<input type="checkbox"/>	MCQ	The set of activities that allows the body to respond or adapt to the needs and stress of physical effort is	physical fitness	biological strength	neuro adjustment	nutritional balance	C	eExam
<input type="checkbox"/>	MCQ	The professionals that does NOT provide wide range of individual and group assessment, interventions and referrals of students are	counsellors	social workers	economists	psychologists	A	eExam
<input type="checkbox"/>	MCQ	What services provide individual students with information on balanced feeding?	nutritional	recreational	health	safety	A	eExam
<input type="checkbox"/>	MCQ	Which of the following does NOT represent learning experiences provided by physical education?	health talks	rhythms and dance	games and teams	movement skills	B	eExam
<input type="checkbox"/>	MCQ	Safe and healthful school environment culminates the following EXCEPT	physical	economic	cultural	biological	B	eExam
<input type="checkbox"/>	MCQ	The interrelatedness of physical, emotional and social conditions that affect students' well-being is	physiology environment	psychological environment	healthy surrounding	free ecological surrounding	B	eExam
<input type="checkbox"/>	MCQ	The following are school health services EXCEPT	ensure inadequate use of primary health care	management of chronic infection	provision of emergency care to the injured	prevention of communicable diseases	A	eExam

<input type="checkbox"/>								
<input type="checkbox"/>	MCQ	What is main focus of health education curriculum?	discourage students to improve their health	open greater avenue for health dangers	reduce health risk behaviours and prevent diseases	promote diseases infections and contamination	C	eExam
<input type="checkbox"/>	MCQ	Which of the following is NOT a dimension that organised health education curriculum addressed?	mental	emotional	social	political	D	eExam
<input type="checkbox"/>	MCQ	The commonest natural disaster in the school environment	volcanoes	earthquake	thunder	erosion	D	eExam
<input type="checkbox"/>	MCQ	Road traffic accidents could be caused by the following EXCEPT	drunkenness	bad roads	faulty vehicle	buglar proof	D	eExam
<input type="checkbox"/>	MCQ	Which of the following problems does NOT relate to safety?	disease and sickness	air disasters	injuries and labour relation	road accidents	A	eExam
<input type="checkbox"/>	MCQ	The capacity building avenue for people to know what to do to avoid accidents is called safety	education	information	control	prevention	A	eExam
<input type="checkbox"/>	MCQ	The wrong human traits that could induce accidents in the schools are	eating, Drinking and cleaning	dancing, sweeping and playing	attitudes, beliefs and habits	culture, actions and tradition	C	eExam
<input type="checkbox"/>	MCQ	When was National Health Education Curriculum established ?	1981	1983	1985	1989	C	eExam
<input type="checkbox"/>	MCQ	Which of the following has to do with pupils' content deficiency ?	lack of home work	poor salary	inability to complete syllabi	poor supervision from government	C	eExam
<input type="checkbox"/>	MCQ	The adaptation of physical education to pupils' maturity level relate to	intellectual and conceptual capabilities	physiological and intellectual capabilities	height and pshchological capabilities	theoretical and family capabilities	B	eExam
<input type="checkbox"/>	MCQ	Pupils' academic performance is affected by	non-qualified teaching staff	adequate teaching/learning materials	prompt payment of pupils' fees	well equipped resource centre	A	eExam
<input type="checkbox"/>	MCQ	Parental supports for pupils performance in physical education include the following except	provision of textbooks	payment of fees	denial of food	supervision of homework	C	eExam
<input type="checkbox"/>	MCQ	Primary school physical education teaching and learning should focus more on the sense of	hearing	seeing	feeting	smelling	B	eExam
<input type="checkbox"/>	MCQ	Learners' readiness to learn as major factor in academic achievement has relationship with their	memorisation	measurement	maturation	mentorship	C	eExam

<input type="checkbox"/>	MCQ	The scope of health education that deals with human protection and prompt attention to victims is	smoking and exercise	exercise ,rest and sleep	mental health	safety and first aid	D	eExam
<input type="checkbox"/>	MCQ	Which of the following is not a dominant factor in the life of healthy person?	eating habit	environment	heredity	life style	A	eExam
<input type="checkbox"/>	MCQ	The commonest risk behaviour that endanger school pupils lives are	smoking and exercise	alcohol and drug abuse	sex and drug abuse	drug abuse and football	A	eExam
<input type="checkbox"/>	MCQ	Whichof the following interaction does not depict social wellness?	cordial interactions with friends	ideal interactions with visitors	acceptable interactions with animals	positive interactions with classmates	C	eExam
<input type="checkbox"/>	MCQ	The definition of health as a state of complete mental and social well-being was given by	university college hospital	food and agricultural organisation	world health organisation	nigerian medical association	C	eExam
<input type="checkbox"/>	MCQ	What could be responsible for diverse definitions of health?	nature of ailment	type of hospital	presence of disease	past experiences	D	eExam
<input type="checkbox"/>	MCQ	The physical activities that are meant for the physically handicapped pupils is said to be	adapted	extramural	intramural	instructional	A	eExam
<input type="checkbox"/>	MCQ	The main advantage of intramural activity is	development of interest and values	promotion of friendship and self-esteem	encourage sports competition in schools	gain deeper knowledge in physical education	B	eExam
<input type="checkbox"/>	MCQ	Instructional activity in physical educationallows pupils to acquire	knowledge and inter- class	skills and knowledge	attitudes and inter school	interest and friendship	B	eExam
<input type="checkbox"/>	MCQ	Which of thefollowing is a movement opportunity by water?	diving	football	tumbling	tennis	A	eExam
<input type="checkbox"/>	MCQ	Physical education involve movement opportunities through the following except	terrestrial	aquatic	perennial	aerial	C	eExam
<input type="checkbox"/>	MCQ	Physical education is that phase of education which teach skills, knowledge and attitudes through	human action	human stagnancy	human living	human movement	D	eExam
<input type="checkbox"/>	MCQ	Which of the following is not a direct individual's stage that is developed by physical education	running	social	emtion	intellectual	A	eExam
<input type="checkbox"/>	MCQ	What fundamental concept was derived the foundation of physical education	a sound speed in a sund leg	a sound blood in an enlarged heart	a soundbmind in a sound body	a sound body on a sound bed	C	eExam
